EDUCATION

University of California, San Diego
Bachelor of Science in Computer Science

Expected June 2027
GPA: 4.0/4.0

EXPERIENCE

Scientific Software Engineering Intern
Atrisense

June 2026 – Present
San Diego, CA

- Built high-performance **3D geometry processing pipelines** for large volumetric datasets.
- Developed probabilistic optimization algorithms to improve geometric alignment accuracy.
- Designed scalable data processing workflows for **automated feature extraction** and statistical modeling, **reducing reconstruction error by 70%**.

Machine Learning Researcher
UC San Diego

Sept 2024 – Present
San Diego, CA

- Improved data efficiency** for CGYRO fusion surrogates by building a **Bayesian Active Learning pipeline** with **General Atomics**.
- Identified top acquisition strategies** by designing and benchmarking **11**(EIG, MC-dropout, output-weighted) in a modular PyTorch framework.
- Cut experiment time 10×** by parallelizing runs across GPUs with **Docker + Kubernetes**.

Software Engineering Intern
Revicid Inc.

March 2025 – June 2025
New York, NY

- Architected a data engine** using custom headers to bypass access restrictions, achieving a near **90% success rate** through multiple tests on government websites.
- Redesigned full-stack reports with integrated **maps and timelines**, improving readability by **30%**.
- Developed **automated parsing pipelines** with logic-based stopping conditions.

Vice-President Internal
Computer Science and Engineering Society

Sept 2023 – June 2026
San Diego, CA

- Implemented **Agile project management** in Notion, reducing coordination overhead by **36%**.
- Led initiatives for **100+ attendees**, increasing engagement by **40%** through team collaboration.
- Managed financial logistics and **budgets for 140+ members** and organization-wide events.

PROJECTS

Software Engineer | *MERN Stack, Gemini API, Meta Messenger API, Stripe*
Operon

April 2026 – June 2026

- Architected an AI booking pipeline** using Gemini and Meta Messenger APIs to automate Instagram-based travel reservations.
- Engineered a **state-driven backend** using MongoDB and Express to manage conversational workflows with 100% session persistence.
- Streamlined payment by integrating **Stripe** and automated document generation.

Software Engineer Lead | *Next.js, React, Supabase, Salesforce API*
Runway Avenue

Sept 2025 – June 2026

- Led a team of **7 developers**, managing onboarding and Agile planning through Notion.
- Architected a backend integrating the **Salesforce API** with a **Supabase failover system**.
- Developed a **React frontend** to track user clickstreams and dwell time via interaction metrics.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL, HTML, CSS
Database & Backend: Node.js, MongoDB, Firebase, REST APIs, Supabase, PostgreSQL, HDF5
Frameworks & Libraries: React, NumPy, pandas, SciPy, PyTorch, TensorFlow, JUnit
Tools & Practices: Git, GitHub, AWS, Docker, CI/CD, Agile, Figma, Stripe, Gemini API
